

Meet us at IBC 2022!

We're excited by the opportunity to meet with our clients, partners and the wider video tech industry at IBC this year.

We will be showcasing our latest cloud-native video applications, including multi-CDN switching, hybrid-cloud content delivery, open caching, recording management, and analytics.

To schedule a meeting with one of our content delivery experts at our stand in Hall 5 (5.C64), please click the link below:

Dynamic, multi-CDN switching

Transform your video network efficiency by intelligently routing streams over public and private CDNs to scale-out content delivery.

Hybrid-cloud CDN

Get ready for stream growth with hybrid-cloud CDN technology. Flex capacity on-demand by bursting to virtualised caches that scale instantly

Open Caching

Generate new revenue streams by integrating your CDN with Open Caching compliant OTT services.

SaaS recording orchestration

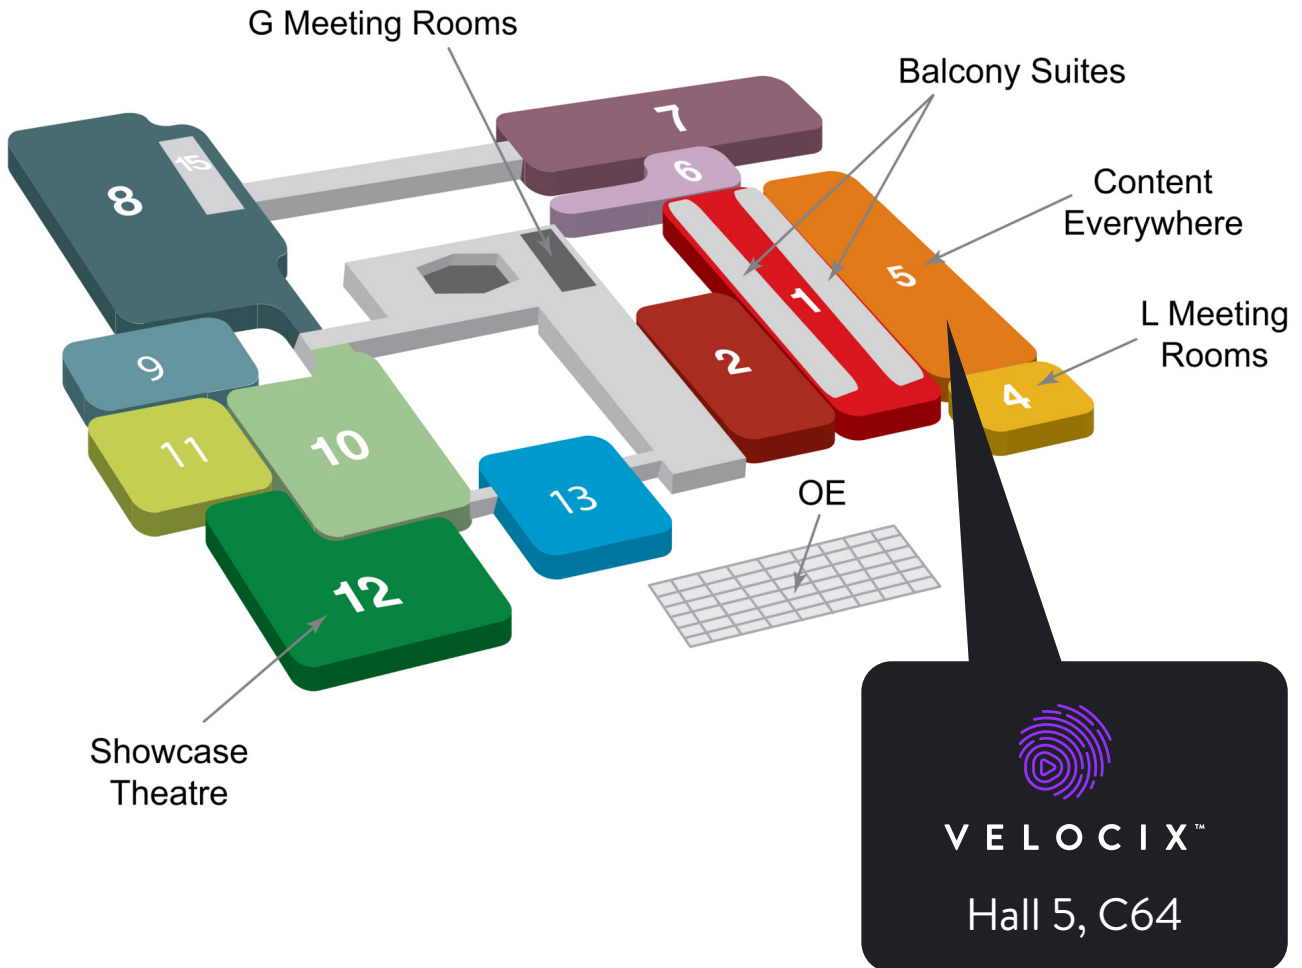

Streamline cloud DVR and time-shifted video workflows and reduce financial risks with unified, SaaS recording orchestration across your regions.

Analytics

Strengthen streaming efficiency, the viewing experience and marketing intelligence with deep network and subscriber insights.

IBC 2022 floorplan

Free entry passes

To gain free entry to the IBC exhibition, please click the button below and register using Velocix's Exhibitor Customer Code: **IBC7992**. This code is active until August 19 2022.

Content Everywhere Stage discussion panel

At IBC 2022, you will have the opportunity to hear from Jon Anderson, CDN Product Manager at Velocix, who will be participating in the Hall 5 Content Everywhere Stage discussion panel on **'Environmental sustainability and the cloud's contribution to tackling climate change'**, which takes place on Friday September 9 2022 at 14:00. To learn more about this important topic, schedule a meeting with Velocix.
